SandBlast API documentation | CheckMates

A personal firewall is an application which controls network traffic to and from a computer, permitting or denying communications based on a security policy. Typically it works as an application layer firewall.

Personal firewall - Wikipedia

Hi evollic: What do you mean by " - IP spoofing is turned on with VPN IP Pool selected. ". 1. Since VPN IP Pool would be on the outside , you should not include this IP Pool in the Anti-IP Spoofing list. This would make Firewall believe that this IP range is inside and will block all the traffic coming from Outside.

Checkpoint VPN - Secureclient connection issues, can't

Example Network layer firewall: In Figure 2, a network layer firewall called a "screened subnet firewall" is represented. In a screened subnet firewall, access to and from a whole network is controlled by means of a router operating at a network layer.
