Machine Learning.pdf - Free Download

Machine Learning, Tom Mitchell, McGraw Hill, 1997. Machine Learning is the study of computer algorithms that improve automatically through experience. Applications range from datamining programs that discover general rules in large data sets, to information filtering systems that automatically learn users' interests.

Machine Learning, Tom Mitchell , McGraw Hill, 1997.

Text from page-3. PREFACE The field of machine learning is concerned with the question of how to construct computer programs that automatically improve with experience.

122 machine learning grown in this fashion, accumulating hidden units until the network residual error is reduced to some acceptable level. Fahlman and Lebiere (1990) report cases in which CASCADE-CORRELATION significantly reduces training times, due to the fact that only a single layer of units is trained at each step.
