wood handbook--chapter 7--fastenings - fpl.fs.fed - such factors as type of nail point, type of shank, time the nail remains in the wood, surface coatings, and moisture content changes in the wood. effect of seasoning with practically all species, nails driven into green wood and pulled before any seasoning takes place offer about the same withdrawal resistance as nails driven into seasoned wood and pulled soon after driving. however, if common ... **nail withdrawal strength and nailhead pull-through of ...** - apa - the engineered wood association has conducted more than 1,900 tests on wood structural panels (plywood and osb) of different thicknesses using three different types of nails under three different exposure conditions to investigate the effect of these variables on nail withdrawal strength. **screw- and nail-gluing techniques for wood composite ...** - screw- and nail-gluing techniques for wood composite structures c. gerber & k. crews university of technology sydney, faculty of engineering, sydney, australia **strength of wood joints made with nails, staples, or screws** - the wood, the nail, and the condition of use, but in general any variation in these factors has a more pronounced effect on withdrawal than on lateral load. the principal variations in wood are its specific gravity, moisture content, and direction in which the nail is driven with respect to grain. the harder woods ... **nuts, bolts & machine screw sizes nail size chart** - nail size chart: expansion bolt, often called the molly bolt, for hollow walss (plaster board) toggle bolt for hollow walls expansion shield for masonry fiber anchor for masonry wood screw heads shank by gauge, length in inches types: flat head round head oval head phillips lag head fillister head nails types: brad finishing nail casing nail common nail duplex nail spike (larger than 16d) size ... **table of contents fasteners nails, spikes and wood bolts ...** - *the length of the thread, l t, on wood screws having cut threads shall be equiva- lent to approximately two-thirds of the nominal length of the screw. for rolled threads, l t shall be at **empirical threshold values of roof connections using pull ...** - connection is wood screw, tearing will always be the mode of failure for the connection. the maximum loads are 1.43 kn, the maximum loads are 1.43 kn, 1.26, kn and 1.37 kn for wood nail, metal screw and wood screw respectively. **solid and engineered wood flooring 1 of 4** - solid and engineered wood flooring may be installed by nailing or screwing onto joists or existing timber sub-floors. they can also be glued down onto a timber or solid sub-floors. note : we recommend screw fixing when installing onto chipboard and osb type of sub-floors. **the the wood products council ces) aia/ces structural ...** - 16d nail 75 .25 19 loading direction parallel to grain vs. perpendicular to grain which connection is stronger? load direction grain ... (design shear of ½" lag screw in syp) critical wood properties . critical wood properties dowel bearing strength ability for the wood above the fastener to support the fastener ¼" 3/8" ½" ¾" which one of these holes supports the least weight ... **timber connections centre for offsite construction ...** - the most common type of nail is the smooth steel wire nail which has a circular cross- section and is cut from wire coil having a minimum tensile strength of 600n/mm 2 . **fastener type chart - bolt depot** - wood screw anchors this anchor is made of lead and can be used with wood screws or sheet metal screws. hollow wall anchors a.k.a. molly bolts. used for light duty anchoring in drywall or other hollow walls. anchor bolts l shaped, machine threaded anchors. typically embedded in concrete when it is poured. nail drive anchors non removable anchors that expand inside the hole when the nail like ... **screws for cold-formed steel-to-wood and wood-to-cold ...** - wood screw shall be inserted into the lead hole using a screw driver or other tool, not by driving with a hammer. no reduction to design values is anticipated if soap or other lubricant is used on the screw or in the lead holes to **determination of screw and nail withdrawal resistance of ...** - int. j. mol. sci. 2008, 9 629 lexa concluded nail withdrawal resistances of steal nails covered with an epoxy resin that was nailed into dried and green spruce, fir, and fagus orientalis wood [13]. **fastener loads for plywood - screws** - wood has occurred, resistance to fastener-head embedment into the metal causes the screw to become a shear specimen and joint behav- ior is dependent upon the shear strength of the fastener. **table of contents fasteners nails, spikes, and wood torque ...** - table of contents 1473 nails, spikes, and wood screws 1476 wire nails and spikes 1477 wood screws rivets and riveted joints 1478 riveted joint design
